Project: A Bridge Across the Atlantic

Grade: 5c

Teacher: Zorana Brodarić

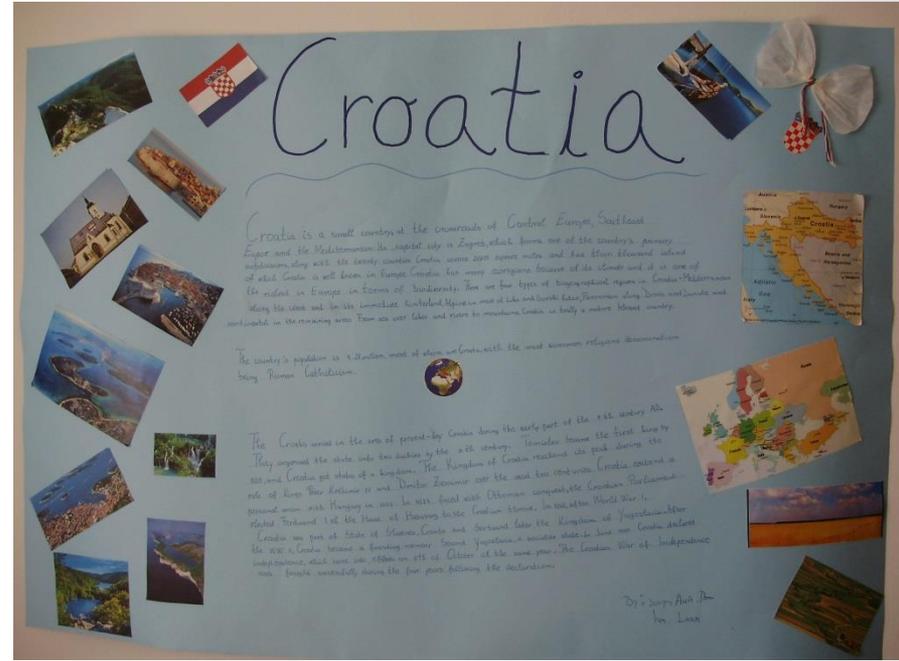

Our teacher divided us in groups and gave each group a different task. She even set up a Facebook group, where we shared our ideas, kept in touch with each other frequently, reported our progress and helped each other, if needed.

Once we gathered all the information we wanted to share with you, we started to put the pieces of our project together. It took us quite some time because we sometimes disagreed on picture or text choices or didn't know how to write something so we asked our teacher.

The flag of Croatia. The red-white-blue tricolour has been used as the Croatian flag since 1848.

Red and white color come from Croatian coat of arms and the blue color comes from the coat of arms of Dalmatia and Slavonia.

The coat of arms of Croatia consists of one main shield and five smaller shields. The main coat of arms consists of 13 red and 12 white fields. It is commonly known as šahovnica - "chessboard". The five smaller shields represent five different historical regions within Croatia, in order from left to right: the oldest known symbol of Croatia, the Republic of Dubrovnik, Dalmatia, Istria and Slavonia.

- Trogir is a small town on the Adriatic Coast. It was founded in the 3rd century BC. The name comes from the Greek word “Tragos” which means male goat because the surrounding hills were full of goats.
- It changed many rulers during history. At first a Greek colony, it became a major port during Roman period, in the 12th and 13th century a prosperous independent city, from 15th century under a long-term Venetian rule. After the fall of Venice, Trogir became a part of Habsburg Empire until WW I after which it united with Croatia into the State of Slovenes, Croats and Serbs and then the Kingdom of Yugoslavia. After the WW II it belonged to the second Yugoslavia, and from 1991 to Croatia.

Coat of arms

The old town of Trogir is actually a small islet connected both to mainland and the island of Čiovo with bridges.

- Trogir, a town which today is on the UNESCO list of the World Cultural Heritage as the best preserved Romanesque-Gothic town in Central Europe, offers a lot of sights that are worth visiting.
- Must-see sights are: Cathedral of Saint Lawrence with its remarkable portal by Master Radovan (our school is named after him), Kamerlengo Fortress, Town Gate, Čipiko Palace, Town Hall, Church of Saint Nicholas, the city museum, the picture gallery and the 'Kairos' art collection.

Primary education is split in two levels:  
from the 1<sup>st</sup> through 4<sup>th</sup> grade, being taught by one teacher  
per grade, with subjects such as: Croatian, maths, art, music,  
PE, and science.

From the 5<sup>th</sup> through the 8<sup>th</sup> grade, where different  
teachers teach different subjects, adding new subjects such as  
history, geography, biology, chemistry, physics, T.E. The most  
popular foreign languages are English, German, Italian, and  
French. All schools teach English as soon as the first grade.

The classes usually start at 8 o'clock  
and finish at one (morning shift), or at

special school programmes for children  
with learning difficulties. During lessons pupils study  
subjects, and after school they can do extra-curricular  
activities, such as: sport or drama.

We are an ECO school and pupils take care of the garden.  
We used to grow flowers all around school but now we are more oriented on olive trees.

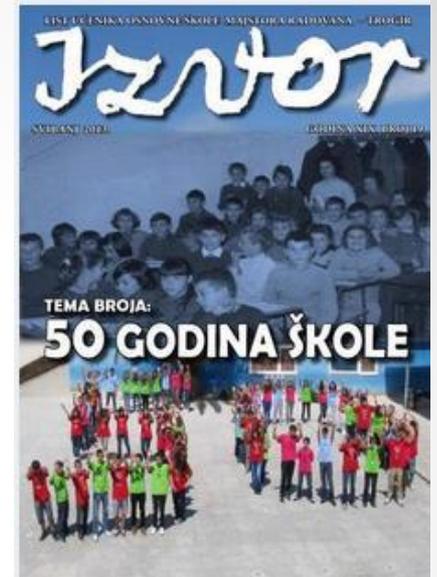

Majstor Radovan school was the first primary school in Croatia which introduced videoconference distant learning with the island of Drvenik Veliki.

Pupils decorating the walls.

We also have a school library where we can read books, watch TV or work on projects.

## NIKOLA TESLA

Nikola Tesla (10 July 1856 – 7 January 1943) was born and raised in Smiljan, Croatia but later he emigrated to the USA where he worked and died. He is one of the most famous inventors of all times and we can't even name all his inventions. However, the electricity is one of the biggest! He had photographic memory and was known to memorize books in his head. He also had a powerful imagination and the ability to visualize in three dimensions, which he used to control the terrifying nightmarish he suffered from as a child. He never shook hands with anyone because he was a germaphobe and he also had OCD. It's in part what makes him such a mystical and eccentric character.

He and his partner started Penkala-Moster Company and built a pen-and-pencil factory that was one of the biggest in the world. This company, now called TOZ Penkala, still exists today. He also invented: a hot water bottle—his first patented invention, the "Termofor", a rail-car brake and an anode battery.

The Croatian cuisine is specific for every region, reflecting the country's geography, history, and culture. A single type of Croatian cuisine does not exist, because each Croatian region has its own, unique cuisine. Many Croatian traditional festivities are linked with food and every holiday has its typical dish but we cannot write them all. The choices among the specialties are endless!

**Dalmatia** - fish, olive oil, vegetables and self-sown herbs found near the sea is why this cuisine is considered to be very healthy. But, Dalmatia has also many subregions so food preparation and dishes are different. Typical Dalmatian desserts are simple but tasty. The most usual ingredients include Mediterranean fruit, dried figs and raisins, almonds and honey.

The cuisine of Istria and the Kvarner is a special Croatian style of cooking, a blend of inland and coastal. These regions are rich in excellent fish and seafood, cheese and olives, many traditional wine cellars. Some of the famous dishes are: Istrian soup (actually cooked wine), Istrian maneštra, Istrian fuži with truffles.

The northwest Croatia - Bread is mostly made from maize and cakes are often similar in texture to bread. Many pasta dishes, dairy products as well as plenty of vegetables (beans, potatoes, cabbage, etc. But they also eat a lot of turkey, geese, sausages and pork. Their famous dishes are: turkey with mlinci (special kind of pasta), zlevanka, štrukli, strudels of all kinds.

## Ingredients

2kilos; beef, top round  
20 grams; smoked/dried bacon  
200 grams; onions  
150 grams; parsley root  
150 grams; carrot  
50 grams; celery root  
2 garlic cloves  
20 grams; tomato paste  
200ml, cooking oil or olive oil  
10g, cloves  
10 dried plums  
300ml, red wine  
100ml vinegar  
3 bay leaves  
rosemary leaves  
salt  
pepper

*Wash and wipe the meat and then insert the pieces of bacon, parsley, carrot and herbs in it using a knife or something similar. Add enough salt, it and place it in the "pac" (a container with a mixture of vinegar and oil enough to cover the meat). Let it marinate like this for at least 5 hours (overnight preferably).*

*Brown the meat in hot oil (all sides). Remove it from the pan and quickly sauté the chopped onion, garlic and vegetables.*

*Return the meat to the pan and simmer covered for about 4 hours. Occasionally add small amounts of red wine mixed with water and little bit of sugar - Dalmatian prosecco works great as a replacement for this.*

*When the meat is half tender, add a bit of tomato concentrate, washed prunes. By the end of the cooking, stir in the bay leaf, rosemary, thyme, minced cloves... Add pepper and little salt. Balance the flavour with a bit of red wine and prosecco in order to get a sweet & sour taste.*

*Remove the meat, cut it into slices and place on a heated plate.*

*Purée the vegetables with roast dripping and pour it over the meat.*

*Serve with homemade gnocchi.*
